SUMMARY

Computer Science (AI & ML) graduate from VTU with an 8.3 CGPA, currently working as an AI Developer at RK Developers, where I've shipped Android apps, company websites, and internal data tooling end to end. The last two years have mostly been hands-on data and AI work — Python, SQL, Advanced Excel, Power BI, and scikit-learn — plus a live LLM application I built and deployed myself, iterating on prompts until accuracy crossed 90% on real queries. Google-certified in Analytics and Cloud, and available for immediate joining.

EXPERIENCE

AI Developer — RK Developers, Bengaluru

Feb 2026 – Present

Bengaluru-based software development company delivering Android apps, websites, and internal data tools; a paid, full-time role reporting to the engineering lead.

- Shipped two Android apps and two company websites end to end since joining in February 2026, owning everything from UI design to deployment.
- Built internal dashboards and data tooling around app usage and attendance records, turning raw data into something the team could actually read and act on.
- Added AI features into the products using LLM APIs and prompt engineering, keeping the builds practical rather than just experimental.

Android App Development Intern — MindMatrix (VTU MoU Partner) · Online Internship

Feb 2026 – May 2026

- Built Android apps in Kotlin, working hands-on with Google AI Studio and Cloud Labs — the internship where generative AI really clicked into place for me. Rated Excellent.
- Owned UI, feature development, debugging, and Firebase auth across sprints, with every sprint ending in working, tested code.

EDUCATION

B.E. – Computer Science & Engineering (AI & ML)

May 2026

Vijaya Vittala Institute of Technology, VTU – Bangalore | CGPA: 8.3 / 10

Senior Secondary (Class XII), CBSE – Army Public School, Bangalore

2022 | 80%

Secondary (Class X), CBSE – Army Public School, Bangalore

2020 | 88%

TECHNICAL SKILLS

Languages: Python, SQL, C, C++, Kotlin

Data & Analytics: Advanced Excel (PivotTables, VLOOKUP, Power Query), Pandas, NumPy, Power BI, Tableau, Data Cleaning, Statistical Analysis

ML & AI: scikit-learn, NLP, LLM Integration, Streamlit, Time Series Analysis, Generative AI, Prompt Engineering

Mobile Development: Kotlin, Jetpack Compose, Firebase, Android Studio, Google AI Studio

Cloud & Tools: Google Cloud Platform, Microsoft Azure, Git & GitHub, REST APIs, Jupyter Notebook

PROJECTS

DemandSense – Retail Forecasting & Anomaly Detection Dashboard | Python, scikit-learn, statsmodels, Streamlit | github.com/eris03/DemandSense

- Multi-store demand forecasting (Holt-Winters vs. gradient boosting, auto-selected by backtest score) with rolling-MAD anomaly detection and an auto-generated manager briefing on top.

Movie Recommendation System | Python, scikit-learn, NLP | github.com/eris03/movie-recommendation-system

- Content-based recommender that suggests titles from similarity scoring; most of the time went into cleaning the dataset and tuning features until the suggestions actually felt relevant.

LLM-Powered Chatbot Application | Python, LLM APIs, Prompt Engineering, JavaScript | github.com/eris03/llm-chatbot

- Python (FastAPI) backend hitting an LLM API with a React frontend, deployed live. Kept iterating on the prompts myself until accuracy crossed 90% on real user queries.

FieldTrack Pro – Attendance Tracking App | TypeScript, Firebase, Android | github.com/eris03/fieldtrack-pro

- Field attendance tracker with GPS, selfie punch-in, and task categories for RK Developers, with an admin dashboard so managers can pull and analyse records themselves — live and in use.

CERTIFICATIONS

- Google Analytics Certified Professional — Google, Sep 2025
- Prompt Design in Agent Platform — Google Cloud Skills Boost, May 2026
- Prepare Data for Analysis with Power BI, and Introduction to Microsoft Azure & Discover Data Analysis — Microsoft, Aug 2025
- Data Science, AI & GenAI — Super 30 Program, Pragyan AI, 2026
- Agent Blazer — Salesforce Trailhead, 2026

ACHIEVEMENTS & ACTIVITIES

- Reached Google Cloud Silver League (710 points from GCP labs); shipped 10+ independent projects, four of them live today.
- Technical Events Lead for the college fest — coordinated 20+ volunteers for 300+ participants.
